[Mid-level] Missing/too short descriptions [56 pages]

⊙ Level	Mid-level
⚙ Status	Done

URL	Current Metadsc	Updated Metadesc
https://docs.blnkfinance.com/advanced/configuration	Customise your Blnk server using the blnk.json file.	Configure your Blnk server with precision. Learn how to customize settings via **blnk.json** file or environment variables (SSL, database, rate limits, notifications, telemetry)
https://docs.blnkfinance.com/changelog/blnk-core	Latest features, releases, and improvements	Explore the Blnk Core changelog. Track our releases, fixes, enhancements, and version history for Blnk's core platform
https://docs.blnkfinance.com/sdks/overview	Open-source libraries for your favourite languages	Get started with Blnk SDKs. Browse language-specific SDKs, features, installation steps, and integration examples to build faster

https://docs.blnkfinance.com/advanced/backup-disk	Learn how to backup your Blnk data to a local disk	Learn how to back up Blnk data to disk. Step-by-step instructions for snapshots, directory backup, retention, and recovery for on-prem environments
https://docs.blnkfinance.com/advanced/backup-s3	Learn how to backup your Blnk data to the cloud	Set up Blnk backups to Amazon S3. Configure continuous offsite snapshots, security settings, lifecycle rules, and disaster recovery in S3
https://docs.blnkfinance.com/balances/asset-classes	Learn how to set your asset classes (currencies)	Understand Blnk asset classes. See definitions, categorizations, and how asset classes impact balances and reporting in your financial system
https://docs.blnkfinance.com/balances/historical-balances	Retrieve accurate historical balance information	Access historical balances with Blnk. View past account snapshots, retrieve balance timelines, and analyze trends across time periods
https://docs.blnkfinance.com/balances/introduction	Learn how balances work in Blnk	Introduction to Blnk balances. Discover balance types in Blnk, and how Blnk

		handles account balances and reconciliations.
https://docs.blnkfinance.com/changelog/blnk-cli	Latest releases, and improvements	Browse the Blnk CLI changelog. Find updates, fixes, new commands, and version history of the Blnk command-line tool
https://docs.blnkfinance.com/hooks/create-hooks	Learn how Hooks work in the Blnk Ledger	Learn to create hooks in Blnk. Step-by-step guide for registering webhooks, handling events, and integrating real-time notifications
https://docs.blnkfinance.com/hooks/examples	Explore examples of how Hooks can be used in Blnk.	Explore practical examples of Blnk hooks, including real payloads and common use cases to streamline webhook integration
https://docs.blnkfinance.com/hooks/overview	Learn how Hooks work in the Blnk Ledger.	Learn how Blnk webhooks work, what events are supported, and how to configure reliable event-based notifications
https://docs.blnkfinance.com/identities/introduction	Learn how identities work in Blnk	Get started with Blnk identities by understanding how user identities are structured and integrated into

		financial workflows
https://docs.blnkfinance.com/identities/link-balances	Learn how to link identities to a balance	Find out how to link users and account balances within Blnk to enhance data accuracy and traceability
https://docs.blnkfinance.com/ledgers/introduction	Learn how ledgers work in Blnk	Understand how Blnk ledgers operate, including transaction recording, ledger architecture, and accounting logic
https://docs.blnkfinance.com/metadata/overview	Learn how to use metadata in Blnk.	Discover Blnk metadata features, how metadata is defined and used, and ways to attach custom attributes to financial objects
https://docs.blnkfinance.com/reconciliations/overview	Learn how to reconcile your Blnk Ledger.	Explore how Blnk handles reconciliations, including matching logic, reconciliation workflows, and error handling for financial data
https://docs.blnkfinance.com/sdks/typescript/introduction	Learn how to work with the Blnk SDK for TypeScript.	Get started with Blnk's TypeScript SDK, learn how to install, initialize, and integrate with your TypeScript projects
https://docs.blnkfinance.com/search/overview	Learn how to retrieve any	Understand Blnk's search capabilities, key

		data in your Ledger.	features, supported query types, and how to embed search in your applications
https://docs.blnkfinance.com/search/querying	Learn how to use the query field.	Learn how to query Blnk data using search. Dive into query syntax, filters, sorting options, and best practices for efficiency	
https://docs.blnkfinance.com/transactions/backdated-transactions	Learn how to log past transactions in your ledger	Learn to create backdated transactions in Blnk, control effective dates, and handle historical accounting scenarios with precision	
https://docs.blnkfinance.com/transactions/bulk-transactions	Learn how to handle bulk transactions in Blnk	Process multiple transactions at once using Blnk bulk API, speed up operations, and ensure efficient batch handling of payments	
https://docs.blnkfinance.com/transactions/refunds	Learn how to manage refunds in your Blnk Ledger	Explore how to issue refunds in Blnk, manage refund logic, and track reversed payments in your financial workflow	
https://docs.blnkfinance.com/transactions/statuses	Learn about the different statuses of a transaction	Understand the various transaction statuses in Blnk, what each status	

		means, and how to respond to changes programmatically
https://docs.blnkfinance.com/tutorials/quick-start/escrow-payments	Learn how to implement an escrow payment with Blnk.	Follow the Blnk quick start guide to implement escrow payments, manage hold and release logic, and integrate escrow workflows
https://guide.cloud.blnkfinance.com/start/guide	Learn how to get started with Blnk Cloud	Begin your journey with Blnk Cloud by following our start guide. Learn initial setup, configuration steps, and how to get up and running
https://docs.blnkfinance.com/blnk-cli/cloud/anomalies	Learn how to view anomalies using the CLI.	Detect and examine anomalies in Blnk Cloud using the CLI. Learn commands, filtering rules, and how to respond to irregular events
https://docs.blnkfinance.com/blnk-cli/cloud/upload	Learn how to manage Vault with the Blnk CLI.	Upload data to Blnk Cloud via the CLI to see instructions for file formats, command usage, and validation checks for successful import
https://docs.blnkfinance.com/blnk-cli/ledger/balances	Learn how to manage	Query ledger balances using

	balances with the CLI.	the Blnk CLI. Learn how to fetch account balances, filter results, and export data to your system.
https://docs.blnkfinance.com/blnk-cli/ledger/ledgers	Learn how to manage your ledgers with the CLI.	List and inspect your ledger with the Blnk CLI. Get guidance on commands, output formats, and how to explore your accounts structure
https://docs.blnkfinance.com/blnk-cli/ledger/transactions		Use the Blnk CLI to retrieve ledger transactions, apply filters, view details, and export transaction data for your financial workflows
https://guide.cloud.blnkfinance.com/instances/deploy		Deploy Blnk Cloud instances effortlessly. Follow our step-by-step instructions for provisioning, environment setup, and deployment best practices
https://guide.cloud.blnkfinance.com/organization/billing		Manage your organization's billing in Blnk Cloud. View invoices, set payment methods, and complete payment in one place

https://guide.cloud.blnkfinance.com/account/profile		Update your Blnk Cloud account profile. Change settings, manage credentials, and configure personal preferences for better control
https://guide.cloud.blnkfinance.com/insights/overview		Access insights in Blnk Cloud— explore analytics dashboards, usage metrics, and performance reports for your organization
https://guide.cloud.blnkfinance.com/organization/team		Invite team members, assign roles, and collaborate efficiently in your Blnk Cloud organization
https://guide.cloud.blnkfinance.com/organization/workspace		Set up a workspace in Blnk Cloud, organize projects, manage resources, and segment your workflows.
https://guide.cloud.blnkfinance.com/ledgers/overview		Discover how Blnk Cloud handles ledgers — learn about ledger types, structure, and core accounting logic
https://guide.cloud.blnkfinance.com/ledgers/general-ledger		Explore the general ledger in Blnk Cloud: transaction posting, balances, and accounting

		integrity explained
https://guide.cloud.blnkfinance.com/balances/overview		Get a full view of balances in Blnk Cloud: understand balance types, snapshots, and how data is tracked.
https://guide.cloud.blnkfinance.com/balances/details		View your detailed balance data in Blnk Cloud. Inspect amounts by account, timestamp, and metadata attributes
https://guide.cloud.blnkfinance.com/transactions/overview		Explore all transaction types in Blnk Cloud, including credits, debits, holds, and how each operation works
https://guide.cloud.blnkfinance.com/transactions/details		Check full transaction details in Blnk Cloud — view identities, amounts, status, and related metadata in one place
https://guide.cloud.blnkfinance.com/transactions/workflows		Understand transaction workflows in Blnk Cloud — see how payments, voids, inflights, and reversals are orchestrated
https://guide.cloud.blnkfinance.com/identities/details		Inspect identity records in Blnk

		Cloud — see attributes, linked balances, external IDs, and profile history
